

Implementation Jump Start Package

The ParAccel Implementation Jump Start Package is a pre-defined set of professional services designed to take you from purchase to value realization as quickly and efficiently as possible.

Jump Start Benefits

- ▶ **Quick Win**
Up and operational in 3 weeks or less
- ▶ **Guided Plan**
Full conversion/migration plan
- ▶ **Knowledge Transfer**
Transparently leverage best practices & planning

Additional Offerings from ParAccel Professional Services

- ▶ **Tune-up**
(configuration audit, capacity planning, performance tuning, etc.)
- ▶ **Application development and porting services**
(SQL and stored procedure conversion, ETL conversion, extending core database functionality, etc.)
- ▶ **Analytic modeling services**
- ▶ **Training**

Jump Start Goals

ParAccel's Professional Services team has designed the Implementation Jump Start Package as a 3-week project that enables new customers to:

- ▶ Easily install & configure ParAccel
- ▶ Deploy the ParAccel Analytic Platform so that it rapidly becomes operational in your unique environment
- ▶ Ensure our mutual success by developing a plan to port or develop your application(s) to leverage ParAccel's high-performance
- ▶ Provide preliminary training and knowledge transfer so that your team can quickly become self-sufficient

Kickoff

- Review and confirm a joint agenda for the Jump Start engagement
- Review hardware configuration and installation preparations
- Review database requirements and target application

Installation & Configuration

- Installation and configuration planning
- Review and confirm hardware installation
- Install ParAccel
- ParAccel configuration
- Test and confirm installation

Database Design

- Review and deploy schema for the target application or subject area
- Load a subset of data in order to:
 - Determine appropriate data compression
 - Determine optimal data distribution
 - Determine appropriate data sort key
- Refine schema with preliminary recommendations regarding data distribution, sort, and compression

Load & Query

- Load a subset of your data
- Execute subset of queries against ParAccel to test and confirm proper query execution
- Identify any SQL syntax refinements that may be needed for functionality and/or performance
- Review any other functions or stored procedures as necessary to determine how to best implement on ParAccel

Integration Points

- Review ETL subsystem to define optimal approach to load and update ParAccel
- Review BI subsystem and advise on front-end application integration and tuning (if needed) to optimize overall performance
- Review any other database integration points and advise on integration approach

Preliminary Training

- Provide preliminary training to get started with using ParAccel
- Review basic administrative and operational processes

Implementation Assistance

- Assist your team with starting the implementation tasks outlined from the previous steps

Next Steps

Based on the knowledge gleaned from the engagement, we will assist you with your overall plan to achieve full conversion or migration of your application to ParAccel.

This includes providing full feedback so that you can appropriately plan:

- SQL and/or Stored Procedure conversion
- ETL subsystem development and/or integration
- BI subsystem Integration
- Functional and performance testing
- Go-to-Production approach
- Training needs

ABOUT PARACCEL, INC.

ParAccel, Inc. is the proven leader in high performance analytics. Our software-only platform provides the best scalability and price-performance for the widest variety of analytics, unlocking the most value from all available data for both Operational and Discovery workloads.
